Burke Medical Center has a NEW Emergency Room Physician Group – ERx!

ERx specializes in providing quality, compassionate emergency medicine, inpatient services, and urgent care through independent contractor physicians. Their physicians are highly trained, dedicated, and motivated to serve all areas but proudly specialize in rural areas of the country. Many locations have been staffed by ERx for over a decade. In fact, they have 10 locations in Georgia alone. With the philosophy "Provide the best quality of care to the patient in the most expeditious and sincere manner possible – ALWAYS remembering that the patient is the primary reason we exist," ERx will better help Burke Medical Center serve you, our citizens.
